

ANTOINE D ÉDOUARD

Systems & Security Engineer | Cloud Security | Cybersecurity Operations

01901 | (917) 620-6074 | antoine.edouard.gcs@gmail.com | <https://www.linkedin.com/in/antoine-edouard>

PROFESSIONAL SUMMARY

Systems and security engineer with 10+ years of experience supporting secure enterprise infrastructure, hybrid-cloud environments, and high-availability communications services for 25,000+ users. Experience includes Windows and Linux administration, TCP/NIP networking, IAM, MFA, vulnerability management, centralized monitoring, incident escalation, and technical troubleshooting. Brings hands-on experience with Splunk, Tenable, Wiz, AWS, Azure, automation, ITSM ticketing, and cross-functional support while continuing cybersecurity training through Harvard Extension School and Per Scholas.

TECHNICAL SKILLS

- Security Operations & SOC:** Splunk, Microsoft Sentinel, CrowdStrike, Defender for Endpoint, Tenable, Nessus, Wiz, Qualys, SIEM, EDR, Security Monitoring, Alert Triage, Log Analysis, Threat Detection, Vulnerability Management, Incident Escalation, IOC Analysis, NIST CSF, CIS Controls
- Infrastructure & Network Security:** Windows Server, Active Directory, Group Policy, Linux (RHEL, Ubuntu, CentOS), TCP/IP, DNS, DHCP, VPN, Firewalls, Cisco, Palo Alto, Fortinet, Network Segmentation, Network Hardening, Wireshark, Nmap, Nessus, Routing & Switching, Cisco Unified Communications, SIP/SIPS, SRTP
- Cloud Security & Identity:** AWS (EC2, S3, RDS, IAM, Lambda, VPC, Route 53, Direct Connect), Microsoft Azure, Microsoft Entra ID, IAM, RBAC, MFA, SSO, SAML, PKI, SSL/TLS, CloudWatch, CloudTrail, Security Groups, Network ACLs, Cloudflare WAF
- Security Automation & Infrastructure:** Python, PowerShell, Bash, SQL, Terraform, Ansible, Git, GitHub Actions, CI/CD, Infrastructure as Code, Configuration Management, Security Automation, REST APIs
- ITSM, Monitoring & Security Tools:** ServiceNow, Jira, BMC Remedy, PagerDuty, Grafana, Prometheus, LogicMonitor, Burp Suite, Metasploit, OpenVAS, GitHub, Incident Management, Change Management, Problem Management, Troubleshooting, RCA

PROFESSIONAL EXPERIENCE

Technical Specialist – Infrastructure, Systems Security & Unified Communications

Harvard University, Technology Partner Services — Cambridge, MA | Mar. 2016–Jan. 2026

- Supported secure enterprise communications and hybrid-cloud infrastructure serving 25,000+ users in mission-critical environments.
- Reduced enterprise vulnerability exposure by 40% through assessment, remediation, and security hardening using Tenable and Wiz.
- Supported Okta SSO/MFA integrated with Active Directory and SAML, reducing identity-related incidents by 25%.
- Improved centralized logging, dashboards, and monitoring, reducing incident-response time by 40%.
- Administered SSL/TLS certificates and PKI trust stores to maintain encryption compliance across critical systems.
- Related project:** Enterprise Monitoring & Observability — Built CloudWatch, Grafana, and Prometheus dashboards to improve operational visibility and support faster incident response.

Cloud Systems Engineer, Part-Time

67 Degrees Brewing — Franklin, MA | Jan. 2019–Jul. 2025

- Automated cloud infrastructure provisioning using Terraform and supported cloud integration for consistent operational workflows.
- Built monitoring and observability solutions using IoT and PLC technologies and automated compliance reporting.
- Supported cloud modernization initiatives focused on scalability, operational efficiency, and system resilience.
- Related project:** AWS IoT Monitoring and Resilience Platform — Automated and supported Terraform-managed AWS infrastructure for brewery IoT monitoring, automated alerts, and cloud integration.

Application Specialist – Unified Communications

Harvard University Information Technology — Cambridge, MA | Apr. 2008–Mar. 2016

- Supported Cisco Unified Communications infrastructure with 99.999% availability in enterprise environments.
- Engineered SIP infrastructure and supported security through patching, lifecycle management, and monitoring.
- Modernized the E911 Emergency Notification System, improving emergency-response accuracy by 30%.
- Delivered onboarding, documentation, and technical training that reduced support requests by 20%.
- Related project:** Terraform Infrastructure Automation — Applied repeatable infrastructure-as-code practices to reduce deployment errors and improve configuration consistency.

CERTIFICATIONS AND CAREER DEVELOPMENT

- ITIL® 4 Foundation: Certified | Graduate Certificate in Cybersecurity, Harvard University Extension School — 2025
- Graduate Certificate in Cybersecurity — 2025 | Graduate Certificate in Strategic Management — 2022, Harvard Extension School
- Certificate in Strategy Execution — 2025 | Certificate in Disruptive Strategy — 2024, Harvard Business School Online
- CompTIA Security+: Exam Planned, Q4 2026 | Splunk Core Certified User — Exam Planned, Q4 2026
- AWS Certified Solutions Architect Associate: Training Completed | Microsoft Certified: Azure Administrator Associate (AZ-104) — Training Completed
- Cisco Networking Academy: CCNA Routing & Switching — Coursework Completed | Network Basics and Network Defense — September 2026

EDUCATION

- Cybersecurity and AI Tools Training**— Per Scholas |Cambridge, MA | Aug. 2026–Nov. 2026
- Master of Liberal Arts, Cybersecurity** — Harvard Extension School | In Progress, 12 Credits Received; Expected 2029
- Strategy Execution, 2025; Disruptive Strategy, 2024** — Harvard Business School Online
- Bachelor of Science, Electrical Engineering Technology** — Northeastern University
